

Step into the footprints of adventurers: explore seaports. Become
helmswoman: master windstorms. Be an explorer: make experiments.
Discover islands: Build a campfire at the beach.

You've got an idea... Experiencing sea and nature... Seminar at sea...
Campaign or project work... community... We've got a ship.

"Lovis" is a replica of a freight lugger from the 1920s. In order to keep traditional seafaring alive, the ship was renovated and modified into an educational and project ship from 1998 to 2000. Since then the ship is not operated commercially. Sailing, boat building, protection of the sea, development policy, free and emancipatory education... We also engage ourselves on shore.

You are welcome and cordially invited. We are glad to work together with people who would like to experience something special or want to change something in politics and society.

You've got an idea?
We've got a ship...
LOVIS

Below deck there is enough space for up to 30 sailors. School classes, youth and adult groups can experience traditional maritime shipping in the context of educational journeys and leisure travels. Space is provided for political, social and cultural initiatives for networking and concrete actions.

We also offer seminars of which you determine the topics. Seafaring, ecology, history, gender, climate, migration, theater...? We provide the backgrounds and knowledge to implement the ideas together with you.

The "you" develops to "we" on the ship. Together we navigate "Lovis" from one port to another, cook, make sail and land the ship. Wind and weather will determine the process of our journey. Where will "Lovis" run into port in the evening? Flexibility and spontaneity belong to our program.

Our trips usually last one or two weeks. We sail in the Danish Southern Seas, around Ruegen and in the Gulf of Mecklenburg. Summer time is the time of long journeys: to the northern-most tip of the Baltic Sea, into the Norwegian Sea or around Great Britain.

- Length: 28.6 m above deck, 36.6 m above ground
- Sail surface: 410 m²
- 30 berths in five 4-persons-chambers, one 8-persons-chamber and one 2-persons-chamber
- Two bathrooms in the deckhouse
- Kitchen for the meals of the groups
- Comprehensive seminar equipment
